

**Darrell W. Anderson Construction, Inc.**

April 4, 2007

To Whom It May Concern:

Darrell W. Anderson Construction, Inc. has been a general contractor for 45 years and has worked with a multitude of masonry contractors. It is our opinion that Shane Demler Masonry, Inc. is among the best in the business today.

We have worked with Shane and his crews on approximately 12 projects during the last ten years and as an estimator and project manager I have observe the projects of other contractors to better understand my competition. Many of these projects have used Shane Demler Masonry and I have always been impressed by his work from start to finish.

Several of the projects that Shane has done for us are *Northern Utah Medical Center, Adams Elementary School Addition, Sky View High School Addition and Remodel, Jack's Tire and Oil Complex, North Park Elementary Gymnasium Addition, Nibley 2, 7, 8 Wards New Heritage Building, and is currently working on the Thayne Elementary School.* We have been extremely satisfied with his work especially on the Northern Utah Medical Center that used a Lexington veneer brick which is difficult to lay because of the sloped corners and uneven face. Shane and his crew did a masterful job.

I have personally known the Demler Family for many years. Shane is a third generation mason and was taught the trade "from the ground up". From labor to a layer, he has become a successful owner that still lays brick and block. Come bid time we hope that Shane Demler Masonry, Inc. will be the low masonry bid.

Please feel free to contact our office regarding any of the information in this letter.

Sincerely,

A handwritten signature in black ink, appearing to read "Dennis W. Darley", written over a circular stamp or mark.
