To Whom It May Concern:

Shane Demler Masonry has worked for Raymond Construction on several projects over the past years. They always perform their work in a professional manner and always complete their portions of work on time with quality craftsmanship. When the project is complete they rarely have items on the punch list. If they do they are quick to come and get it fixed without complaint.

The latest project completed by Shane Demler Masonry was Bridger Elementary School. It was completed July 1, 2004. The contract for the masonry was \$690,000. They completed this project in a quick and efficient manner, which allowed us to complete the project a month ahead of schedule.

I would recommend Shane Demler Masonry for any projects that you may have.

Sincerely,

David L. Watts
General Manager
